SUMMARY

React Native Mobile Developer with experience releasing 4 production mobile apps across iOS and Android. Strong in React Native, TypeScript/JavaScript, mobile architecture, AWS Amplify, Firebase, Stripe PaymentSheet, and WooCommerce commerce flows. Experienced as the sole mobile developer on multiple products, owning features end-to-end from UI to backend integration to App Store / Google Play deployment. Seeking roles in React Native, Mobile, or Frontend engineering with opportunities to build fast, ship frequently, and drive product impact.

SKILLS

Languages: TypeScript, JavaScript (ES6+)

Mobile Development: React Native, iOS & Android development, push notifications, deep linking, in-app purchases, performance optimization

Frameworks & APIs: React, REST APIs, GraphQL

Cloud & Backend: AWS Amplify (Gen1/Gen2), AWS Lambda, GraphQL API, Amazon Cognito, Firebase (Firestore, Storage), serverless architectures

Commerce & Payments: Stripe PaymentSheet, WooCommerce REST/Store API

EXPERIENCE

Uth Inc., Remote, United States - *Mobile Application Developer (React Native)* Aug 2022 – Present

- Developed and maintained mobile architecture, reusable components, and state management systems for cross-platform React Native applications.
- Implemented authentication flows using Google, Apple, and Facebook login APIs; integrated push notifications, analytics, and remote config services.
- Built full-stack features using AWS Amplify, Lambda, GraphQL APIs, Cognito user pools, and Firebase services to support user data, content, and scheduling.
- Owned end-to-end release lifecycle: debugging, testing, preparing builds, and managing App Store / Google Play submissions and review feedback.
- Collaborated with a 3-4 person product team on feature definition, UI/UX flows, and roadmap planning.

Key Projects

- **Two Daisies - Wellness & Supplement Tracking App:** Lead developer for a wellness app with supplement tracking, smart reminders, and WooCommerce-based in-app purchases using React Native, AWS Amplify, and Stripe PaymentSheet.
- **U - Campus Utility & Collaboration App:** Built a student platform for college email verification, semester scheduling, note-taking/sharing, and campus information.
- **ONPOST - Base Transport & Community App:** Developed features for on-base transportation, community information, and mapping; contributed to growth to 11K+ combined downloads across iOS and Android and ~1.2K active users.
- **Crew - Self-Improvement Challenge App:** Created a challenge/goal-tracking app using React Native and Firebase with streaks, reminders, and reward mechanics to drive engagement.

EDUCATION

San José State University - B.S. Applied Mathematics

Applied & Computational Mathematics Concentration
